Abstracts

WinterGreen Research announces that it has a new study on Worldwide nanotechnology thin film lithium-ion battery markets. The 2009 study has 412 pages, 112 Tables and Figures. Worldwide Nanotechnology lithium-ion batteries are poised to achieve significant growth as units become smaller and less expensive broadening the types of energy applications in which they are included.

Worldwide nanotechnology thin film lithium-ion batteries are poised to achieve significant growth as units become more able to achieve deliver of power to electric vehicles efficiently. Less expensive lithium-ion batteries allow leveraging economies of scale and proliferation of devices into a wide range of applications. According to Susan Eustis, lead author of the study, "Economies of scale leverage the lithium-ion battery nanotechnology advances needed to make lithium-ion batteries competitive. Nanotechnology provided by lithium-ion research solves the issues poised by the need to store renewable energy. Lithium-ion batteries switch price reductions are poised to drive market adoption by making units affordable."

Nanotechnology results obtained in the laboratory are being translated into commercial products. The processes of translating the nanotechnology science into thin film lithium ion batteries are anticipated to be ongoing. The breakthroughs of science in the laboratory have only begun to be translated into life outside the lab, with a long way to go in improving the functioning of the lithium-ion batteries. Unlike any other battery technology, thin film solid-state batteries show very high cycle life. Using very thin cathodes (0.05 μ m) batteries have been cycled in excess of 45,000 cycles with very limited loss in capacity. After 45,000 cycles, 95% of the original capacity remained.

Then there is the problem of translating the evolving technology into manufacturing process. What this means is that the market will be very dynamic, with the market leaders continuously being challenged by innovators, large and small that develop more cost efficient units. Systems integration and manufacturing capabilities have developed a broad family of high-power lithium-ion batteries and battery systems. A family of battery products, combined with strategic partner relationships in the transportation, electric grid services and portable power markets, position vendors to address these markets for lithium-ion batteries.

Electric Vehicles depend on design, development, manufacture, and support of advanced, rechargeable lithium-ion batteries. Batteries provide a combination of power, safety and life. Next-generation energy storage solutions are evolving as commercially available batteries. Lithium-ion batteries will play an increasingly important role in facilitating a shift toward cleaner forms of energy.

Innovative approaches to materials science and battery engineering are available from a large number of very significant companies -- GE, Panasonic Sanyo / Matsushita Industrial Co., Ltd., NEC, Saft, Toshiba, BYD / Berkshire Hathaway, LG Chem, Altair Nanotechnologies, Samsung, Sony, A123 Systems with MIT technology, and Altair Nanotechnologies.

Markets for lithium-ion batteries at \$911 million in 2008 are anticipated to reach \$9.1 billion by 2015, growing in response to decreases in unit costs and increases. Lithiumion batteries used in cell phones and PCs, and in cordless power tools are proving the technology. Units are shipped into military markets and are used in satellites, proving the feasibility of systems. Small, lithium-ion prismatic batteries prove the feasibility of this technology. The large emerging markets are for hybrid and electric vehicles powered by renewable energy systems.

THIN FILM LITHIUM ION BATTERY EXECUTIVE SUMMARY

Worldwide Nanotechnology Thin Film Lithium-Ion
Battery Market Driving Forces
 Market Driving Forces
 Nanotechnology Forms the Base for Lithium-Ion Batteries
 Competitors
Lithium-Ion Battery Market Shares
Lithium-Ion Battery Market Forecasts

1. THIN FILM LITHIUM ION BATTERY MARKET DESCRIPTION AND MARKET DYNAMICS

1.1 Lithium-Ion Battery Target Markets
 1.1.1 Project Better Place and the Renault-Nissan Alliance
 1.1.2 Largest Target Market, The Transportation Industry
 1.1.3 Electric Grid Services Market
 1.1.4 Portable Power Market, Power Tools
1.2 Lithium-Ion Battery Technologies Transportation Industry Target Market
1.3 Energy Storage For Grid Stabilization
 1.3.1 Local Energy Storage Benefit For Utilities
1.4 Applications Require On-Printed Circuit Board Battery Power
 1.4.1 Thin-film vs. Printed Batteries
1.5 Smart Buildings
 1.5.1 Permanent Power for Wireless Sensors
1.6 Battery Safety / Potential Hazards
1.7 Thin Film Solid-State Battery Construction
1.8 Battery Is Electrochemical Device
1.9 Battery Depends On Chemical Energy
 1.9.1 Characteristics Of Battery Cells
 1.9.2 Batteries Are Designed Differently For Various Applications

2. THIN FILM LITHIUM ION BATTERY MARKET SHARES AND MARKET FORECASTS

2.1 Worldwide Nanotechnology Thin Film Lithium-Ion Battery Market Driving Forces
 2.1.1 Market Driving Forces

- 2.1.2 Nanotechnology Forms the Base for Lithium-Ion Batteries
- 2.1.3 Competitors
- 2.2 Lithium-Ion Battery Market Shares
 - 2.2.1 ExxonMobil Affiliate in Japan / Tonen Chemical
- 2.3 Lithium-Ion Battery Market Forecasts
- 2.4 Electric Vehicle and Hybrid Vehicle Lithium-Ion Battery Market Shares
 - 2.4.1 BYD
 - 2.4.2 Johnson Controls-Saft
 - 2.4.3 Saft Battery Technologies
 - 2.4.4 A123Systems 32 Series Automotive Class Lithium Ion™ Cells:
 - 2.4.5 NEC and Nissen
 - 2.4.6 LG Chem
 - 2.4.7 EnerDel
 - 2.4.8 Competition
- 2.5 Electric and Hybrid Vehicle Lithium-Ion Battery Market Forecasts
 - 2.5.1 Largest Target Market, The Transportation Industry
 - Thin Film Advanced Lithium-Ion Battery EV Market
 - Thin Film Lithium-Ion And Lithium Polymer Automotive Batteries
- 2.6 Thin-Film and Printed Batteries: On-Board Solutions for Low-Power Electronics
 - 2.6.1 Solicore Tiny Flat Battery
 - 2.6.2 Thin-Film, Organic, and Printed Batteries: On-Board Solutions for Low-Power Electronics
- 2.7 Cell Phone, Communications, And PC Lithium-Ion Battery Technology Markets Discussion
 - 2.7.1 Samsung SDI
 - 2.7.2 BYD
 - 2.7.3 Saft
 - 2.7.4 Portable Power Competition
- 2.8 Lithium-Ion Battery Technology Portable Power Market, Power Tools Market Shares
 - 2.8.1 A123 Systems
- 2.9 Lithium-Ion Battery Technology Portable Power, Power Tools Market Forecasts
- 2.10 Lithium-Ion Battery Technology Electric Grid Services Markets
 - 2.10.1 Electric Grid Services
- 2.11 Thin Film Lithium-Ion Battery Market Positioning
 - 2.11.1 US And Its Allies Are Changing The Military Landscape
- 2.12 Digital Device Battery Forecasts

3. THIN FILM LITHIUM-ION BATTERY PRODUCT DESCRIPTION

3.1 A123 Systems

3.1.1 A123 Systems Lithium Ion Cell Construction Based On A Dual Plate Tubular Design

3.1.2 A123Systems 32 Series Automotive Class Lithium Ion™ Cells:

3.1.3 GM and A123Systems Co-Develop Lithium-Ion Battery Cell for Chevrolet Volt

3.1.4 A123Systems / GE Production Contract for Norewegian Think Electric Vehicles

3.1.5 A123Systems Patent for Nanophosphate™ Lithium Ion Battery Technology

3.2 LG Chem

3.2.1 LG Lithium-Ion Cylindrical Battery

3.2.2 LG Lithium-ion Polymer Battery

3.2.3 LG Lithium-ion Battery Prismatic Type

3.2.4 LG Chem

3.3 SAFT

3.3.1 Saft Lithium-ion (Li-ion) Batteries

3.3.2 Saft is Li-ion Batteries For Commercial GEO Satellites to JSC ISS of Russia

3.3.3 Saft Contract To Power Hybrid Electric Mobile Utility Systems From Titan Energy

Development

3.3.4 Saft and ABB Develop New High Voltage Li-ion Battery System

3.3.5 Saft Hybrid Battery Technology for Wisconsin Clean Energy

3.3.6 Saft High-Energy Lithium-Ion (Li-ion) Batteries For Raytheon

3.3.7 Saft Lithium-Ion (Li-ion) Battery Backup Systems

3.3.8 Saft Energy Storage As A Key Renewable Energy Enabling Technology

3.3.9 Saft / Solion Large Li-ion batteries

3.3.10 Saft Lithium-Sulfur Dioxide (Li-So₂) Batteries

3.3.11 Saft Lithium Technologies

3.3.12 Saft Lithium-thionyl chloride (Li-SOCl₂)

3.3.13 Lithium-thionyl chloride (Li-SOCl₂) - LS/LST/LSG cell ranges

3.3.14 Saft Small LS/LST bobbin cells

3.3.15 Saft Large LS/T bobbin cells

3.3.16 Saft Lithium-Manganese Dioxide (Li-MnO₂)

3.3.17 Saft Lithium-ion (Li-ion)

3.4 BYD

3.4.1 Warren Buffett Buys 10 Percent Stake In BYD Chinese Battery Manufacturer

3.4.2 BYD Battery Expertise

3.5 Panasonic / Sanyo

3.6 Samsung

3.7 Ener1 / EnerDel

3.7.1 EnerDel Lithium-Ion Prismatic Design

3.7.2 EnerDel Addressing Market Demand for Hybrid Electric Vehicles (HEVs)

- 3.7.3 EnerDel 5Amp Battery Pack
- 3.8 Imara
- 3.9 ExxonMobil Affiliate in Japan / Tonen Chemical
 - 3.9.1 Tonen Chemical Leading Supplier Of Separators For Lithium Ion Batteries
- 3.10 NEC**
 - 3.10.1 Nissan and NEC Group
 - 3.10.2 Nissan And NEC Joint Venture
 - 3.10.3 NEC High-Performance Lithium-Ion Batteries Employ A Compact Laminated Configuration
 - 3.10.4 NEC / Nissan Low-Cost Lithium-Manganese Batteries
 - 3.10.5 NEC Lamilion Energy
 - 3.10.6 NEC Subaru
 - 3.10.7 NEC Thin Film Battery Has Sixteen Modules Consisting Of Twelve Cells, Serially Connected
 - 3.10.8 NEC / Subaru Thin Film Battery Flat Shape
- 3.11 Sony
- 3.12 Matsushita Industrial Co., Ltd. (Panasonic)
 - 3.12.1 Panasonic Lithium Batteries
 - 3.12.2 Panasonic Lithium-Ion Rechargeable Batteries
- 3.13 E-One Moli Energy
 - 3.13.1 Product Data Sheets
- 3.14 QuantumSphere
- 3.15 Solicore Ultra Thin-Film Battery
 - 3.15.1 Solicore's Flexion Lithium Polymer Batteries
 - 3.15.2 Solicore Flexion Lithium Powered Cards
 - 3.15.3 Solicore RFID (Radio Frequency Identification) Devices
 - 3.15.4 Solicore's Flexion® Batteries Bluechip Million Unit Purchase
 - 3.15.5 Solicore Supports Smart Cards
- 3.16 Cymbet EnerChip™ Solid-State, Rechargeable Thin-Film Batteries
 - 3.16.1 Cymbet Enerchip™ Sensors Support
- 3.17 Front Edge Technology
- 3.18 Excellatron Thin-Film Micro-Batteries
 - 3.18.1 Contrast To Conventional Lithium Cells
 - 3.18.2 Excellatron Market Advantage
 - 3.18.3 Excellatron Battery Current State of the Art
 - 3.18.4 Excellatron Battery Intrinsically Safe
 - 3.18.5 High Temperature Performance of Excellatron Thin Film Batteries
 - 3.18.6 Excellatron Long Cycle Life
 - 3.18.7 Excellatron Polymer Film Substrate for Thin Flexible Profile

- 3.18.8 Excellatron Unique Proprietary Passivation Barrier and Packaging Solution
- 3.19 Front Edge 50,000 Prototypes Of Nanoenergy Batteries
 - 3.19.1 Front Edge Technology (FET)
- 3.20 Infinite Power Solutions (IPS) Flexible Thin-Film Batteries
 - 3.20.1 Infinite Power Solutions
- 3.21 Oak Ridge Micro-Energy
 - 3.21.1 Oak Ridge Micro-Energy Thin Film Batteries
- 3.22 Energizer
 - 3.22.1 Energizer Holdings
- 3.23 Valence
 - 3.23.1 PVI for Valence's U-Charge(R) XP Energy Storage Systems
 - 3.23.2 Valence Lithium Phosphate
 - 3.23.3 Valence Lithium Phosphate Stability and Dependability
 - 3.23.4 Valence Safety Focus
 - 3.23.5 Valence Lithium Phosphate Alternative to Lead-Acid
 - 3.23.6 Valence Lithium Phosphate Storage and Run-Time
 - 3.23.7 Valence Lithium Phosphate Safety and Maintenance Free
- 3.24 ITN Energy Systems
 - 3.24.1 ITN Intelligent Processing, Sensors, & Controls:
 - 3.24.2 ITN Control:
 - 3.24.3 ITN Sensors
 - 3.24.4 ITN Unique Sensors: X-Ray Fluorescence And Parallel Detection Spectroscopic Ellipsometer
- 3.25 ULVAC**
- 3.26 Intersil

4. THIN FILM LITHIUM ION BATTERY TECHNOLOGY

- 4.1 Vendor Lithium-ion Battery Strategy
 - 4.1.1 Rechargeable Lithium Batteries Characteristics
- 4.2 Challenges in Battery Design
 - 4.2.1 Advanced Lithium-ion Batteries Requirements
- 4.3 Vendor Lithium-Ion Battery Positioning
 - 4.3.1 High-Quality, Volume Manufacturing Facilities
- 4.4 Applications Of Lithium-Ion Batteries
- 4.5 Mobile Phone Industry
 - 4.5.1 Nanowires
 - 4.5.2 Thin Film Battery Enabling Chemistries
 - 4.5.3 The Cathodes

- 4.5.4 Solid State Devices Provide More Energy Density
- 4.6 Advantages of Lithium-Ion Batteries
 - 4.6.1 Lithium-Ion Battery Shortcomings
 - 4.6.2 Charging
 - 4.6.3 Applications
 - 4.6.4 Costs
- 4.7 Lithium Cell Chemistry Variants
 - 4.7.1 Lithium-ion
 - 4.7.2 Lithium-ion Polymer
 - 4.7.3 Other Lithium Cathode Chemistry Variants
 - 4.7.4 Lithium Cobalt LiCoO_2
 - 4.7.5 Lithium Manganese LiMn_2O_4
 - 4.7.6 Lithium Nickel LiNiO_2
 - 4.7.7 Lithium (NCM) Nickel Cobalt Manganese - $\text{Li}(\text{NiCoMn})\text{O}_2$
 - 4.7.8 Lithium Iron Phosphate LiFePO_4
- 4.8 Operating Performance Of The Cell Can Be Tuned
- 4.9 Lithium Metal Polymer
 - 4.9.1 Lithium Sulphur Li_2S_8
 - 4.9.2 Alternative Anode Chemistry
- 4.10 ExxonMobil affiliate, Tonen Chemical Polyethylene-Based, Porous Film
- 4.11 Cymbet Alternate Manufacturing
- 4.12 Thin-Film Batteries Packaging
- 4.13 ITN Energy Systems Fibrous Substrates, PowerFiber
 - 4.13.1 ITN Sensors
- 4.14 Cell Construction
- 4.15 Impact Of Nanotechnology
- 4.16 Thin Film Batteries
 - 4.16.1 Thin Film Battery Timescales and Costs
 - 4.16.2 High Power And Energy Density
 - 4.16.3 High Rate Capability
- 4.17 Comparison Of Rechargeable Battery Performance
- 4.18 Polymer Film Substrate
- 4.19 Micro Battery Solid Electrolyte

5 NANOTECHNOLOGY THIN FILM BATTERY LITHIUM-ION COMPANY PROFILES

- 5.1 Nanotechnology Thin Film Battery Lithium-Ion
- 5.2 A123 Systems
 - 5.2.1 A123 Systems Revenue

- 5.2.2 A123Systems Registration Statement for Initial Public Offering
- 5.2.3 A123 Systems Batteries Benefits
- 5.2.4 A123 Systems Competitive Advantage
- 5.2.5 A123 Systems Strategy
- 5.2.6 A123Systems and GE
- 5.2.7 A123 Acquisition of Hymotion
- 5.2.8 Procter & Gamble Duracell and A123 Systems Collaborate
- 5.2.9 Cobasys and A123 Systems
- 5.3 Advanced Cerametrics
- 5.4 Altair Nanotechnologies
 - 5.4.1 Altair Nanotechnologies Power and Energy Group
 - 5.4.2 Altair Nanotechnologies Performance Materials Division
 - 5.4.3 Altair Nanotechnologies Life Sciences Division
 - 5.4.4 Altair Nanotechnologies One-Megawatt Battery System Available for Commercial Operation by AES Energy Storage, LLC
 - 5.4.5 Altair Nanotechnologies Revenues
- 5.5 Applied Data
- 5.6 Bekaert
- 5.7 Robert Bosch GmbH
- 5.8 Boston Power / Sonata
- 5.9 BYD**
 - 5.9.1 Warren Buffett Buys 10 Percent Stake In BYD Chinese Battery Manufacturer
- 5.10 Cymbet
 - 5.10.1 Cymbet Thin-Film, Solid-State Battery Technology
 - 5.10.2 Cymbet and ANT Wireless Sensor Network
 - 5.10.3 Garmin International ANT™ Wireless Network
- 5.11 Dow
- 5.12 E-One Moli Energy Group
- 5.13 Ener1
 - 5.13.1 Ener1 Third Quarter 2008 Revenue
 - 5.13.2 Ener1 Positioning Technology Originally Pioneered By Argonne National Lab
 - 5.13.3 Ener1 Acquires Enertech Leading Korean Lithium-ion Battery Cell Producer
 - 5.13.4 Ener1 / Enertech Specializes In Producing Large Format Flat ("Prismatic") Cells
 - 5.13.5 EnerDel Operations
- 5.14 Energizer
- 5.15 Excellatron
- 5.16 Exxon
 - 5.16.1 ExxonMobil Chemical / Tonen Chemical Corporation
- 5.17 Front Edge Technology (FET)
