Abstracts

COVID-19 pandemic is expected to have far reaching impact on world economy and multiple industries. While the telecommunications sector is rather unscathed as of now, due to increasing demand and consumption of mobile data and broadband services, uncertainty looms over the ambitious 5G implementation plans that services providers had put in place. This report provides insights on the service provider strategies pertaining to 5G and the country level 5G regulations and readiness. We profile some of leading service providers across major countries and highlight operator strategies in dealing with Covid-19 Pandemic.

Key questions answered by the report:

What is the potential impact of COVID-19 on 5G implementation plans in various countries and on different service providers?

What are the initial business strategies of service providers to tackle challenges posed by COVID-19?

What is the current 5G services market scenario across various countries?

What are the major challenges of 5G adoption across various countries?

Who are the current 5G service providers in the profiled countries, who are their partners, and what is their current state of 5G deployment maturity?

Which are the use cases that will drive the adoption of 5G services across different sectors and who are the players that are currently planning to cater to

those use cases?
