EXECUTIVE SUMMARY

The gin market in CIS Countries was equal to 104.00 million USD (calculated in retail prices) in 2014. Until 2024, the gin market in CIS Countries is forecast to reach 350.49 million USD (in retail prices), thus increasing at a CAGR of 7.51% per annum for the period 2019-2024. This is a decrease, compared to the growth of about 20.60% per year, registered in 2014-2018.

The average consumption per capita in

value terms reached 0.47 USD per capita (in retail prices) in 2014. In the next five years, it grew at a CAGR of 20.19% per annum. In the medium term (by 2024), the indicator is forecast to slow down its growth and increase at a CAGR of 7.27% per annum.

Gin has been one of the fastest growing categories in the global spirits industry over the last few years. Premium and super-premium gins have been especially popular segments, which is why several large companies such as Bacardi, Davide Campari-Milano and Pernod Ricard introduced their exclusive lines of high-end gins. One of the main reasons for the growing popularity of this beverage is its suitability as an ingredient in a wide variety of drinks, as well as the consumers' interest in gin cocktails. Gin is a constantly expanding category, which is rapidly changing and innovating in terms of products, producing regions and consumers. In fact, due to the growing interest in this category companies such as Amazon have also been attracted to the market. The e-commerce giant launched its first spirits brand across Europe, Tovess Single Batch Crafted Dry Gin. The company is entering the market by offering similar quality product to the market leaders but at a lower price than the traditional supermarkets. In addition, some vodka brands such as Purity Vodka have also entered the market, owing to the pressure of gin in the market. As with the other spirits, there is an increasing interest in flavored gin variants. Companies such as Puerto de Indias

launched exotic flavors such as orange flower, vanilla and jasmine aromas. Furthermore, pink gin is another hot trend, which has started to boom in the market in the past few years. It is normal gin that has been flavoured with fruits such as strawberries, raspberries or red currants. The wide use of classic botanicals including watercress, lavender, and coriander is also a prominent trend on the market. Moreover, most of the bartenders are looking for different ways to use them. Although sales of gin are booming, alcohol consumption as an overall decreases. Following the global trend towards the consumption of low- and non-alcohol drinks, some of the companies within the market have developed an alcohol-free type of gin that is gaining popularity. Some of the examples include Siegfried Wonderleaf from Rheinland Distillers or Flu?re from Dutch VOC Spirits.
