So, if you are interested in the Czech tea market, this research report will provide you with reliable,

expert-verified and real market data you can safely and confidently base your decisions on. In a quick and hassle-free way, it will provide you with a strategic analysis of the market, its recent and future development. In addition, this solution will save you time and money while presenting you all the necessary information, empowering you to make informed commercial decisions and move your business forward!

This report is one of the most in-depth publicly available business analyses that exists on this particular market. And it is all here in one place, just a few clicks away!

Report Customization

If the report as is does not work for you, you can get it customized, according to your own specific requirements and criteria. Feel free to contact us for more information!

EXECUTIVE SUMMARY

The tea market in Czech Republic was equal to 51.20 million USD (calculated in retail prices) in 2014. Until 2024, the tea market in Czech Republic is forecast to reach 67.22 million USD (in retail prices), thus increasing at a CAGR of 2.16% per annum for the period 2019-2024. This is a decrease, compared to the growth of about 2.99% per year, registered in 2014-2018.

The average consumption per capita in value terms reached 4.83 USD per capita (in retail prices) in 2014. In the next five years, it grew at a CAGR of 2.92% per annum. In the medium term (by 2024), the indicator is forecast to slow down its growth and increase at a CAGR of 2.17% per annum.

The tea market has evolved dramatically in the past few years in line with consumers' changing behavior. Today, tea drinkers are more interested in high-quality products with a great story and drinks that give them specific health benefits, which has driven demand for healthy

green, functional botanical tea and herbal blends. In addition, the perception of tea has also changed, as it is viewed by most younger consumers as a sensual and wellness drink.

Premiumization is another positive development on the market, as customers are showing strong preferences for functional botanical blends and single estate artisanal teas. More and more people are interested in innovative flavor combinations, as well as in authenticity and the story behind certain brand. When it comes to different types, a recent trend suggests that natural, earthy alternative flavors such as ginger, matcha, turmeric and cumin are in higher demand. Cheese tea is another food service phenomenon, which has been especially popular in Asian countries such as Malaysia, Taiwan, and China. Another interesting trend on the tea market is the emergence of tea pairing menus. Since customers are increasingly opting for unique and experience led products, different restaurants have been trying to enhance culinary experience by introducing a several course tea pairing menu. In addition, the tea market has been expanding outside the category of hot beverages with the development of new ready-to-go drinks and iced tea variants. Kombucha, for example, has shown an impressive growth over the past few years from a niche product to a well-established product in mainstream supermarkets.
