MARKET SUMMARY

Global organic fluorochemicals market is a part of global fluorochemicals industry. Fluorochemicals include various product types such as inorganics, specialties, fluorocarbons, and fluoropolymers. Fluorochemicals have unique chemical properties and are widely used in chemical manufacturing along with dental and medical fields. Fluorochemicals are mainly used in refrigeration and air conditioning. Fluorochemicals can also be utilized in pesticides, mostly in the agricultural industry. They are also used in a wide range of herbicides.

VALUE AND VOLUME

Global organic fluorochemicals market was valued more than USD 12,000 million in the year 2016 and it is expected to reach more than USD 15,000 million by 2024. The global organic fluorochemicals market is expected to exhibit a CAGR of more than 3% between 2017 and 2024. In terms of volume, the demand for organic fluorochemicals is expected to reach around 3,000 kilotons in 2024 growing at a CAGR of more than 3% during the forecast period.

DRIVERS AND RESTRAINTS

The major factor driving the growth of organic fluorochemicals market is the increasing refrigeration requirement across various end-user industries. Soaring global temperatures along with demand for cold storage systems and climate control systems have boosted the demand for HVAC and refrigeration systems across the globe.

Increasing number of applications of the organic fluorochemicals in pharmaceuticals, healthcare, and automobile industries increases the demand for organic fluorochemicals.

Organic fluorochemicals market may observe a decline in demand in refrigeration applications owing to impending and already enforced a regulatory ban on usage of certain organic fluorochemicals.

However, increasing demand for blowing agents which use organic fluorochemicals would provide ample opportunities for the growth of the global organic fluorochemicals market during the forecast period.
